

Astera Labs Selected as Finalist for Most Respected Private Semiconductor Company by Global Semiconductor Alliance

November 13, 2023

GSA's membership recognizes Astera Labs for accelerating Generative AI infrastructure deployment

SANTA CLARA, CA, U.S. – November 13, 2023 – [Astera Labs](#), the global leader in semiconductor-based connectivity solutions for cloud and AI infrastructure, today announced that it is a finalist for the Global Semiconductor Alliance (GSA) Most Respected Private Semiconductor Company award. Astera Labs is being recognized for its Intelligent Connectivity Platform, consisting of its PCIe®, CXL™, and Ethernet product lines purpose-built to transport massive datasets throughout advanced AI server platforms deployed by hyperscalers around the world for data-driven applications like ChatGPT.

Jitendra Mohan, CEO, Astera Labs, said, "We are extremely honored to receive this esteemed industry recognition from our peers as a GSA Most Respected Private Semiconductor Company Award finalist for the second year in a row. We've built a stellar team in just six short years who are at the core of our company's success, and we are united through a culture of trust and customer obsession to deliver connectivity products purpose-built to efficiently and rapidly scale AI infrastructure at the world's leading hyperscalers."

Jodi Shelton, Co-Founder and CEO, GSA, said, "GSA and its members view Astera Labs as a fast-rising star in the semiconductor industry, recognizing the company's leadership in delivering critical connectivity solutions for AI infrastructure at cloud-scale. We applaud the company for continuing to demonstrate excellence in its vision, innovation, and execution."

GSA's Most Respected Private Semiconductor Company Award identifies the private company garnering the most respect from the industry in terms of its products, vision, and future opportunity. Companies are vetted for the award by GSA's Private Awards Committee and the award is then voted on by its membership. The winner will be announced at the award ceremony on December 7 in Santa Clara, CA.

About Astera Labs

Astera Labs is a global leader in purpose-built connectivity solutions that unlock the full potential of cloud and AI infrastructure. Our Intelligent Connectivity Platform integrates PCIe, CXL and Ethernet semiconductor-based solutions based on a software-defined architecture that is both scalable and customizable. Inspired by trusted partnerships with hyperscalers and the data center ecosystem, we are an innovation leader of products that are flexible, interoperable, and reliable.
